## **DETAILED ACTION**

The submission of after final amendment filed on 11/04/03 is acknowledged. At this point claims 1, 3 have been amended and the remaining claims left unchanged. Thus, claims 1-19 are at issue in the instant application.

### ***Drawings***

The drawings filed on 11/04/03 are acceptable subject to correction of the informalities indicated on the attached “Notice of Draftsperson’s Patent Drawing Review,” PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

### ***Allowable Subject Matter***

Claims 1-19 are allowed.

The following is an examiner’s statement of reasons for allowance:

Referring to Claim 1 the prior art of record does not show a ring-shaped light conductor element being made of one piece and with two light out-coupling elements being formed from portion of the ring-shaped light conductor element that transmitting into one another because of the ring-shaped structure of the conductor element.

Claims 2-12 are allowed as claims depended on claim 1.

Referring to Claim 13 the prior art of record does not show light conductor element wherein a smallest spacing of the light in-coupling surface from the light-diverting surfaces is a maximum of one and a half times a structural depth of the light out-coupling element.

Claim 14 is objected as claim depended on Claim 13.

Referring to Claim 15 prior art of record does not show light conductor element wherein the light out-coupling elements facing a reflection surface of the reflector.

Referring to Claim 16 prior art of record does not show light conductor element wherein the light-diverting surfaces extend elliptically and two focus positions lying on a line that extends into the respective our-coupling elements.

Referring to Claim 17 prior art of record does not show light conductor element having at least three light-diverting surfaces.

Referring to Claim 18 prior art of record does not show a light-diverting surface having at least one light-decoupling element.

Referring to Claim 19 prior art of record does not show light conductor element wherein at least one of the light-diverting surfaces of the light in-coupling elements is offset from an optical axis of the light source.
